# Introduction to Geographic Information System (GIS) "A Crash Course"

The course is intended as an intro into the GIS science in general in a tight format, it will cover the history of the discipline and the basics of the science while offering tutorials based on Esri ArcGIS software. The first 2 parts will alternate between theoretical and application knowledge plus some tutorials, while the third part will focus on theoretical knowledge and could be used as a road ahead for users interested in more advanced knowledge and applications in the Geospatial field.

**Eligibility:** Only for students and researchers affiliated to partner universities.

**Course Tutor:** Assistant Prof. Abdulmoneim Alfiky
